GIDIGBA AUTHENTICATION SPECIFICATION

Objective

Before the first production run, GIDIGBA must generate serials, generate QR codes, verify products, and log scans.

Serial Format

GPX-001-2602-000001 through GPX-500-2602-000500

GPX = Product Model, 001-500 = Sequence Code, 2602 = Batch Code, 000001-000500 = Unit Number

QR Destination

https://nagidigba.com/verify/{serial}

Verification Results

AUTHENTIC, NOT FOUND, BLOCKED

Product Status Values

Reserved, Printed, Shipped, Active, Blocked

Admin Dashboard

Generate serials, export serial lists, export QR links, view products, search serials, block products, and view scan logs.

Supply Chain Tracking

The platform supports factory, warehouse, distributor, customer, shipping, sales, warranty, and portal records.
